Career Objective

I am an engineering graduate with experience in **Machine Learning**, Mechanical Systems, Electrical and Electronics Engineering, IoT, and Automation. I am seeking an entry-level position where I can apply my technical knowledge, problem-solving skills, and innovative mindset to real-world problems. I want to help create efficient, tech-driven solutions while learning and adapting to market changes.

Professional Experience

Creative IT Institute

Trainee – Machine Learning with Python — Sept 2021 – Jan 2022 [\[PDF\]](#)

- Learned Python for data analysis using NumPy, Pandas, and Matplotlib.
- Performed data cleaning, preprocessing, and feature engineering.
- Conducted exploratory data analysis (EDA) to identify patterns and insights.
- Implemented supervised learning algorithms (Linear Regression, Logistic Regression, KNN, Decision Trees).
- Applied unsupervised learning techniques (K-Means Clustering).
- Trained and evaluated models using train-test split and cross-validation.
- Measured model performance using accuracy, precision, recall, F1-score, and RMSE.
- Used Scikit-learn for model building and evaluation.
- Performed hyperparameter tuning to improve model performance.
- Visualized model results and data trend.
- Gained understanding of overfitting, underfitting, and bias-variance tradeoff.

DataSense

Field Research Assistant under the research project of “Export oriented SMEs within the Context of Bangladesh’s LDC Graduation” — August 15-October 30, 2023. [\[PDF\]](#)

DBL Group

Management Trainee Officer, Maintenance and Planning Dept. — Feb–Nov 2024 [\[PDF\]](#)

Technical Skills

- | | |
|--|---------------------------------|
| • Machine Learning & Python | • Deep Learning & AI |
| • Internet of Things | • Front-End Developer |
| • Sensor & Instrumentation | • PLC & Automation |

Academic Background

Rajshahi University of Engineering and Technology (RUET) 2018–2023

B.Sc. in Mechatronics Engineering — CGPA: 3.20 (3.50 out of 4.00 in last 4 semesters)

Dhaka College 2017

HSC-Science — GPA 5

Motijheel Govt. Boys High School 2015

SSC-Science — GPA 5

Projects

- **House Price Prediction** — Built a regression model to predict house prices based on features such as area, location, and number of rooms.
- **Student Performance Prediction** — Predicted student grades or pass/fail outcomes using academic and demographic data.
- **Spam Email Detection** — Developed a text-based classification model to identify spam and non-spam emails.
- **Iris Flower Classification** — Implemented supervised learning models to classify iris species based on petal and sepal measurements.
- **Movie Recommendation System** — Built a simple recommendation system using similarity measures and user ratings.
- **Sales Prediction** — Used historical sales data to forecast future sales trends.
- **Credit Risk Analysis** — Classified loan applicants as low or high risk using financial attributes.
- **Customer Segmentation** — Applied K-Means clustering to group customers based on purchasing behavior.

Certificates

- Trainee Machine Learning with python- Creative IT Institute
- Complete Generative AI Course With Langchain and Huggingface - Udemy (Learning)

Undergraduate Thesis

Title: Introducing Machine Learning for Individual Radiosensitivity and Post-Health Risk.

—Collected sensitive patient data from Ahsania Mission Cancer Hospital while strictly maintaining confidentiality protocols. These data were essential for analyzing radiosensitivity, and machine learning algorithms were applied to predict cancer patients' radiosensitivity as part of the thesis work.

Organizations & Extracurricular Activities

- Class Representatives (2022, 2023) [\[PDF\]](#)
- Organizer – Robotronics (2022, 2019) [\[PDF\]](#)
- Founding President – MTE Career Club (2023) [\[PDF\]](#)
- Manager – RUET Football Club (2023) [\[PDF\]](#)
- Founding General Secretary – DCFR (2023) [\[PDF\]](#)
- Volunteer – South Asian Games (2010) [\[PDF\]](#)
